

# INDIA TECHNICAL CENTER

## Bengaluru, India

Nexteer's India Technical Center (INTC) in Bengaluru provides advanced software development and driveline physical validation capabilities, strengthening localized engineering support for OEMs while reinforcing India's strategic role in our global network.

### INTC Highlights

Opened in 2018 as a software-focused center, INTC has evolved into a multidisciplinary technology hub spanning software development, simulation, digital validation and now production and design validation testing for driveline systems.

#### Global Software Development

- ASPICE, KGAS, IATF and ASIL functional safety compliant software development
- Rigorous processes to drive operational excellence

#### Center of Excellence

- One-stop-shop for software validation
- Cybersecurity, safety and bootloader expertise

#### State-of-the-Art Analysis Facility

- Bench-level testing facility with work benches, single and dual ECU HiL setup
- System bench for initial release
- Mechanical Teardown Lab

#### Quick Bandwidth and Competency Ramp-up

- Competent skilled engineers with niche skills
- On-demand, qualified bandwidth enhancement with local engineering suppliers

#### Regional Collaboration

- Seamless connection with other Nexteer regional technical centers
- Work as one team of software experts across all global locations

#### Quick Facts

#### Engineering Capabilities

- Software
- Electrical
- Mechanical

#### INTC Focus Areas:

- Software Production and Validation
- Cybersecurity
- Virtual Engineering and Simulations Tools

- Regional Technical Center Support
- RandD Innovation
- Architecture

#### Global Focus Areas:

- Column-Assist EPS Homeroom
- Software Development
