

MEXICO TECHNICAL CENTER

Querétaro, Mexico

Our in-house ownership of R&D, design, testing, validation, and manufacturing provides customers with agility, responsiveness, quality, and value.

MXTC Highlights

Local Engineering and Technical Support Capabilities

8,900-square-meter technical center providing localized engineering expertise and agile technical support to OEM customers across Mexico and North America.

State-of-the-Art NVH Facility

Component level semi-anechoic chambers and full steering system or component level noise testing

Validation Facilities

EPS Field Data Replication Validation Lab includes proprietary methodologies to translate real-world testing into bench simulation

Virtual Engineering

Capabilities that improve efficiency and effectiveness in all phases of product design, development, validation and manufacturing

Quick Facts

Engineering Capabilities:

- Product
- Electrical
- Mechanical
- Manufacturing

Mexico Focus Areas:

- Applications Engineering
- Software Applications
- Systems Engineering
- Validation and NVH Testing
- Vehicle Integration and Testing
- Customer Service Center
- OEM product development and technical support

Global Focus Areas:

- Applications Engineering
