

STEERING COLUMNS & INTERMEDIATE SHAFTS

Improves vehicle safety ratings; enhances driver safety, comfort & convenience

Choose Nexteer Steering Columns & Intermediate Shafts (CIS) for:

- Occupant Protection, **Superior Safety**
- Customized, **Flexible Solutions at a Value**
- **Seamless Vehicle Integration**
- Reduced Mass, **Fuel Efficiency**
- Greater **Performance & Passenger Comfort**
- **Proven, Experienced** Engineering Team

CIS SOLUTIONS FOR EVERY VEHICLE PLATFORM

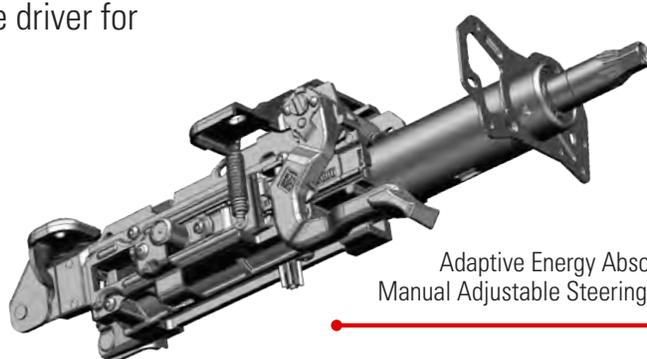

Nexteer offers a wide CIS product portfolio to fit the advanced safety, performance, convenience and packaging needs of small cars, SUVs, trucks and light commercial vehicles – including EVs, hybrids and ICE vehicles.

Our advanced energy absorption systems help improve vehicle safety ratings and include our active systems that automatically compensate for the position of the driver for optimum protection.

- Manual Adjustable Steering Columns
- Power Adjustable Steering Columns
- Stowable Steering Columns
- Crashworthiness – Adaptive Energy-Absorbing Technology
- Integrated Electronics and Sensors
- Security and Transmission Controls
- Wide Intermediate Shaft Portfolio

Stowable Steering Column

Adaptive Energy Absorption on Manual Adjustable Steering Columns

Aluminum Intermediate Shaft

SOLVING CHALLENGES ACROSS INDUSTRY MEGATRENDS

ELECTRIFICATION

Nexteer's CIS technologies offer reduced mass and packaging flexibility for EVs. For example, most EVs are designed with the battery central and low in the vehicle. That's why Nexteer offers an innovative, flexible High Angle I-Shaft to address unique packaging needs.

ADAS/AUTOMATED DRIVING

Our Stowable Steering Column retracts when hands-off driving is engaged – increasing available space for driver comfort and other activities. Beyond hands-off driving, stowable columns can transform any stationary vehicle into a "living or work space" in addition to a person's home or office space.

SOFTWARE

Software influences our column technologies, such as memory recall for power column position and electric steering column locks for intelligent anti-theft systems. In the future, we foresee sensors detecting when a column is stowed or un-stowed from the instrument panel.
