1. INTRODUCTION

This document provides the specific description of a subset of the EDIFACT DELJIT D97.A message used between Nexteer and its Trading Partners.

This guideline is specifically designed to outline the requirements for the Shipping Schedule used by Nexteer.

2. MESSAGE DEFINITION

This document provides the definition of a Shipping Schedule Message, based on the EDIFACT DELJIT D.97A, to be used in Electronic Data Interchange (EDI) between Nexteer and its Trading Partners.

This documentation is fully comprehensive and allows the implementation of the EDIFACT DELJIT without the necessity for any additional standard related documentation.

2.1. FUNCTIONAL DEFINITION

The Shipping Schedule message is a message from Nexteer to a Nexteer Supplier giving details on specific quantities to be delivered to specific delivery points on specific dates and times.

2.2. PRINCIPLES

The Shipping Schedule message is intended to:

- Specify requirements based on the delivery conditions.
- Define the aspects that guarantee synchronization between Nexteer and the Supplier.

2.3. REFERENCES

The content of this message is based on:

- The message structure as defined by EDIFACT for the Delivery Schedule Message DELJIT as published in the UN/EDIFACT D.97A Directory.
- The agreement between the Trading Partners on the data elements to be used, their unique definition, their representation and their values (coded or clear form) as identified in this document.

Nexteer has chosen for the EDIFACT D.97A Directory and consistently uses this directory for all its EDIFACT messages.

2.4. FIELD OF APPLICATION

The following definition of a Shipping Schedule Message in EDIFACT format is applicable for the interchange of shipping instructions issued by Nexteer for material deliveries to one or more Nexteer operations.

3. MESSAGE DESCRIPTION

Following pages contain a full description of the EDIFACT DELJIT D.97A message as implemented by Nexteer. All segments are included regardless whether used or not used in the interchange with Nexteer. The official EDIFACT segment description is complemented with remarks pertaining to the specific requirements for an interchange with Nexteer. Those remarks contain specific code values used, additional information on the values shown in a specific field, etc.

3.1. INTRODUCTION

3.1.1. How to read the documentation

All segments in the subset used by Nexteer are described in the following pages. The segment description is to be read as follows:

① 0020		BGM - BEGINNING OF MESSAGE
②	Segment group:	None.
③	EDIFACT status:	Mandatory.
④	Maximum use:	1 per message.
⑤	Function:	Segment for the unique identification of the delivery schedule document, by means of its name and its number.
⑥	Nexteer interchange:	See remarks.
⑥	Example:	BGM+241+20130711-001+5' A B C “+” separates segment sections; “:” separates elements within a segment section

⑦	REF	TAG	EDIFACT STANDARD DEFINITION				Nexteer IMPLEMENTATION

⑫ COMMENTS

⑬ CODE VALUES

LEGEND

- ① segment position in the message structure, segment tag and segment name.
- ② identification (when applicable) of the segment group in which the segment is situated and indication at which level the segment is in the message.
- ③ status of the segment: as defined by EDIFACT and by Nexteer.
- ④ number of occurrences of the segment: as defined by EDIFACT and as used by Nexteer.
- ⑤ description of the function of the segment as defined by EDIFACT and as used by Nexteer.
- ⑥ example of the segment as it may appear in an interchange. This example is only illustrative and does not necessarily represent an actual situation. It should **NOT** be used as a basis to implement this message.
- ⑦ definition of the segment content as defined by EDIFACT and as implemented by Nexteer.
- ⑧ identification of the data elements in the segment
 - reference to the example.
 - data element tag - data elements with a 'C' denote a composite data element.
 - data element name - *italic CAPITALS* denote a composite data element.
 - **ST** - the status of the data element.
 - **FT** - the format of the data element, i.e. the indication of the number of characters (numerical or alphabetical) for this data element.
 - **SP** - the separator used between the data elements.
 - remarks on the specific use of the data element in the interchange with Nexteer.
- ⑨ shaded areas in the Nexteer description mean that Nexteer does not use the data element.
- ⑩ the segment description can be followed by:
 - comments providing more information regarding specific data elements and how they must be used and/or understood in messages from Nexteer.
 - code values to be used for data elements contained in the message.

3.1.2. General remarks

Following remarks are applicable for the complete documentation:

Dates

Unless otherwise specified in the field explanation in the documentation, dates are always expressed as **CCYYMMDD** (qualifier 2379 = 102).

Times

Unless otherwise specified in the field explanation in the documentation, times are always expressed as **HHMM**.

Nexteer Status

Mandatory: All data elements Marked "Mandatory" should be returned in the DESADV

Conditional: All data elements Marked "Conditional" should be returned in DESADV if sent in the DELJIT / based on some conditions.

Optional: All data elements marked "Optional" may/may not be returned in the DESADV

3.2. SEGMENT TABLE

The following table shows the segments defined for the EDIFACT DELJIT D.97A Delivery Just-in-Time message. Shaded areas identify the segments that are not used in the subset of DELJIT used by Nexteer. This table, which should be read in conjunction with the branching diagram indicates the maximum number of occurrences for each segment.

POS.	TAG	NAME	ST	REPEATS

3.3. BRANCHING DIAGRAM

The branching diagram shows the structure of the message. It is a combination of various segments that are organized in a certain hierarchical order.

A segment is a pre-defined set of functionally related values (e.g., segment NAD groups all values that relate to a Party: name - address - etc.)

Each segment within the branching diagram is broken down into one or multiple data elements. Within a segment, only those data elements that contain data must appear.

3.4. MESSAGE STANDARD DESCRIPTION

This section provides the description of the UN Standard Message DELJIT as defined in the 97A Directory. Only the segments printed in bold are used in the subset defined by Nexteer and will be further explained in section 3.6.

3.4.1 Header section

Information to be provided in the Header section:

0010 **UNH, Message header**

A service segment starting and uniquely identifying a message. The message type code for the Delivery just in time message is DELJIT.

- 0020 BGM, Beginning of message**
A segment for unique identification of the document name and its number.
- 0030 DTM, Date/time/period**
A segment specifying the date and, when relevant, the time/period for delivery of that sequence, relating to the whole message. The DTM segment must be specified at least once to identify the Delivery Just In Time document date.
- 0040 FTX, Free text**
Segment giving additional information relevant to the entire message.
- 0050 Segment group 1: RFF-DTM**
A group of segments giving references relevant to the whole message, e.g. contract number.
\0060 RFF, Reference
A segment for referencing documents to the whole message, e.g. contract, import/export license.
- 0070 DTM, Date/time/period**
Date/time/period as applied the referred document.
- 0080 Segment group 2: NAD-LOC-FTX-SG3**
A group of segments identifying names and addresses and their functions relevant for the whole Delivery Just In Time Message.
- 0090 NAD, Name and address**
A segment for identifying names and addresses and their functions relevant for the whole Delivery Just In Time Message.
- 0100 LOC, Place/location identification**
A segment indicating more details regarding specific place/locations related to the party specified in the NAD segment, e.g. internal site/building number.
- 0110 FTX, Free text**
A segment with free text in coded or clear form, to give further clarification, when required, about the party.
- 0120 Segment group 3: CTA-COM**
A group of segments to identify person, function, department and appropriate numbers to whom communication should be directed.
- 0130 CTA, Contact information**
A segment to identify person, function, department to whom communication should be directed.
- 0140 COM, Communication contact**
Identify communication types and numbers for person, function, department identified in CTA.

3.4.2 Detail section

Information to be provided in the Detail section:

- 0150 Segment group 4: SEQ-DTM-GIR-LOC-SG5-SG7**
A group of segments providing details related to the delivery sequence. All other segments in this Segment Group 4 following the SEQ segment refer to that sequence.
- 0160 SEQ, Sequence details**
A segment providing specific details related to the delivery sequence requested by the buyer or recipient of the product.
- 0170 DTM, Date/time/period**
A segment specifying the date, and when relevant, the time/period for delivery of that sequence.
- 0180 GIR, Related identification numbers**
A segment to be able to give related identification numbers.
- 0190 LOC, Place/location identification**
A segment identifying a general location to which products, as specified in the Segment Group 7, should be delivered.
- 0200 Segment group 5: PAC-SG6**
Segment group to support KANBAN operation where customers must notify a supplier packaging labels and conditions.
- 0210 PAC, Package**
To describe the number and type of packages/physical units.
- 0220 Segment group 6: PCI-GIN**
A segment group giving packaging identification and good identity number related to the segment PAC.

0230 PCI, Package identification

To specify markings and labels on individual packages or physical units.

0240 GIN, Goods identity number

To give specific identification numbers, either as single numbers or ranges.

0250 Segment group 7: LIN-PIA-IMD-ALI-GIR-TDT-FTX-PAC-DTM-SG8-SG9-SG11

A group of segments providing details of the individual line items to be delivered.

0260 LIN, Line item

A segment identifying the details of the product/service being delivered e.g. product identification. All other segments in the detail section following the LIN segment refer to the line item.

0270 PIA, Additional product id

A segment providing additional product identification.

0280 IMD, Item description

A segment for describing the product to be delivered.

0290 ALI, Additional information

A segment indicating that the line item is subject to special conditions owing to origin, customs preference, or commercial factors.

0300 GIR, Related identification numbers

A segment providing sets of related identification numbers for the line item.

0310 TDT, Details of transport

A segment specifying the carriage, and the mode and means of transport of the goods to be delivered.

0320 FTX, Free text

A segment with free text in coded or clear form, to give further clarification, when required, to the line group.

0330 PAC, Package

Segment giving information related to the instruction for package type, which is valid for the specified deliveries of the line item.

0340 DTM, Date/time/period

A segment specifying the date, and when relevant, the time/period for delivery of line item.

0350 Segment group 8: RFF-DTM

A group of segments giving references and where necessary, their dates, relating to the line item.

0360 RFF, Reference

A segment for referencing document and other numbers related to the line item as specified in the LIN segment.

0370 DTM, Date/time/period

Date/time/period as applied to the referred document.

0380 Segment group 9: LOC-SG10

A group of segments providing delivery location information and where relevant contacts.

0390 LOC, Place/location identification

A segment indicating more details regarding specific locations related to the line item.

0400 Segment group 10: CTA-COM

A group of segments to identify person, function, department and appropriate numbers to whom communication should be directed.

0410 CTA, Contact information

A segment to identify person, function, department to whom communication should be directed.

0420 COM, Communication contact

Identify communication types and numbers for person, function, department identified in CTA.

0430 Segment group 11: QTY-SCC-DTM-SG12

A group of segments specifying quantity related information for actual delivery.

0440 QTY, Quantity

A segment to specify pertinent quantities relating to the line item.

0450 SCC, Scheduling conditions

A segment indicating the scheduling conditions.

0460 DTM, Date/time/period

A segment indicating the date/time/period details relating to the quantity and schedule details in the line item.

0470 Segment group 12: RFF-DTM

A group of segments giving references relating to the quantities.

0480 RFF, Reference

A segment for referencing the specific product release information e.g. appointment.

0490 DTM, Date/time/period

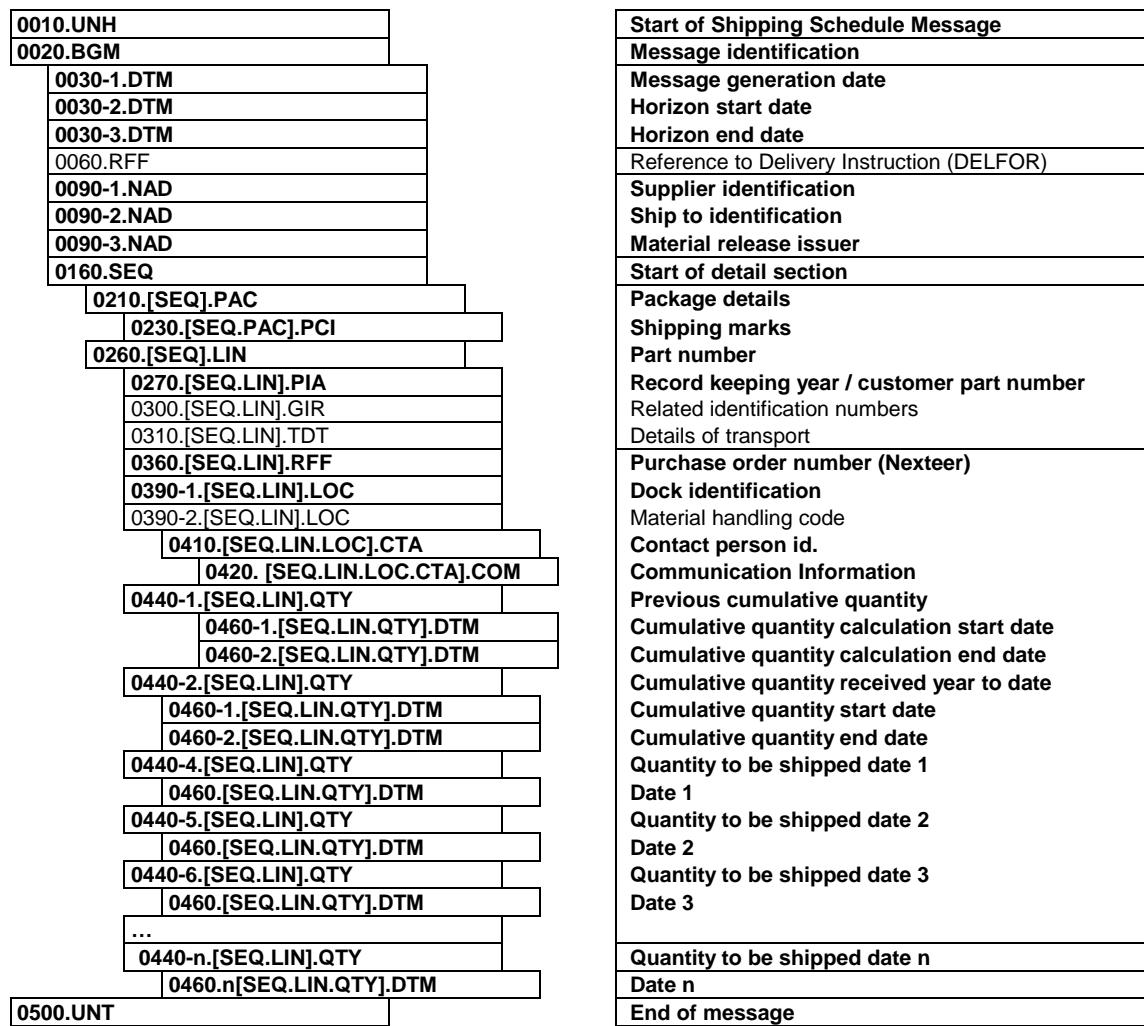

Date/time/period as applied to the referred document.

0500 UNT, Message trailer

A service segment ending a message, giving the total number of segments in the message and the control reference number of the message.

3.5. MESSAGE STRUCTURE

The message structure illustrates how the segments will be repeated in the Shipping Schedule message to accommodate the requirements identified by Nexteer.

3.6. SERVICE SEGMENTS DESCRIPTION

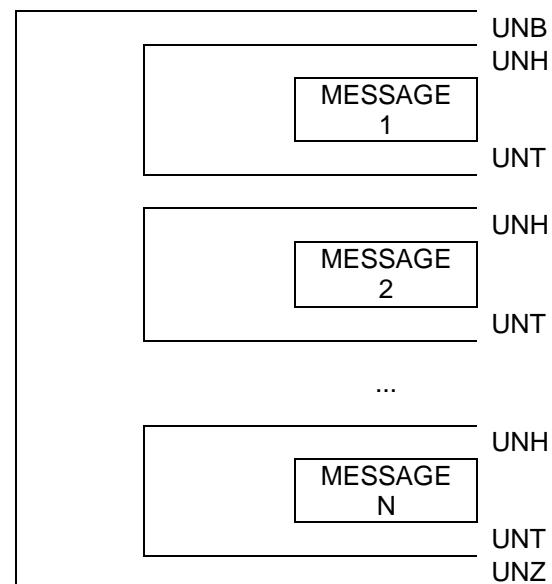

Following service segments are as defined by UN/EDIFACT and presented under ISO 9735.

The UNB, UNH, UNT and UNZ segments are the envelope of any message, enclosing all the data that is being transmitted.

The UNB (Interchange header) and UNZ (Interchange trailer) segments mark respectively the beginning and the end of an interchange thereby providing a unique interchange control reference.

Within the interchange the UNH (message header) and UNT (Message trailer) segments uniquely begin and end the various messages contained in an interchange.

**EXAMPLE OF AN
INTERCHANGE STRUCTURE**

0000 UNB - INTERCHANGE HEADER

Segment Group: none Level: 0
 EDIFACT status: mandatory Nexteer status: mandatory
 Maximum use: 1 per interchange Nexteer occurrences: 1 per interchange
 Function service segment providing the unique identification of an interchange. It allows the identification of the sender and the receiver of the interchange, gives date and time of preparation as well as the interchange control reference and the application reference.
 Nexteer interchange: see remarks.

Example: UNB+UNOA:2+NEXTEER:ZZ+QQQ:ZZ+030325:0725+278
 A B C D E F G

REF	TAG	EDIFACT STANDARD DEFINITION				Nexteer IMPLEMENTATION		
		NAME	ST	FT	SP	ST	FT	REMARKS
A	S001	SYNTAX IDENTIFIER	M			M		
B	0001	Syntax identifier	M	a4	:	M	a4	"UNOA".

E	0051	Controlling agency	M	an..2	:	M	an..2	
E	0057	Association assigned code	C	an..6	+			

COMMENTS**0062 - Message Reference Number**

The Message Reference number used by Nexteer is structured as follows:

First message:	1
Second message:	2
max.:	9999

0500**UNT - MESSAGE TRAILER**

Segment group: none
 EDIFACT status: mandatory
 Maximum use: 1 per message
 Function: service segment ending a message, giving the total number of segments in the message and the control reference number of the message.
 Nexteer interchange: see remarks.

Example: **UNT+33+1'**
 A B

EDIFACT STANDARD DEFINITION							Nexteer IMPLEMENTATION		
REF	TAG	NAME	ST	FT	SP	ST	FT	REMARKS	
A	0074	NUMBER OF SEGMENTS IN THE MESSAGE	M	n..6	+	M	n..6	Control count of the number of segments in the message, including UNH and UNT.	
B	0062	MESSAGE REFERENCE NUMBER	M	an..14	'	M	an..14	Number must be identical to UNH - tag 0062	

0510**UNZ - INTERCHANGE TRAILER**

Segment Group: none
 EDIFACT status: mandatory
 Maximum use: 1
 Function: service segment ending an interchange and giving the number of messages contained in the interchange as well as the Interchange Control Reference number.
 Nexteer interchange: see remarks.

Example: **UNZ+1+278'**
 A B

EDIFACT STANDARD DEFINITION							Nexteer IMPLEMENTATION		
REF	TAG	NAME	ST	FT	SP	ST	FT	REMARKS	
A	0036	INTERCHANGE CONTROL COUNT	M	n..6	+	M	n..6	Number of messages in an interchange.	
B	0020	INTERCHANGE CONTROL REFERENCE	M	an..14	'	M	an..14	Value must be the same as 0020 - Interchange Control Reference in UNB.	

3.7. DATA SEGMENTS DESCRIPTION

This part includes only the segments defined in the standard and used in the subset exchanged between Nexteer and its Trading Partners. The segments are described in the same sequence as they appear in the message.

The EDIFACT DELJIT segments that are not used in the subset used by Nexteer are included in alphabetical sequence under item 3.9.

0020 BGM - BEGINNING OF MESSAGE

Segment group: none Level: 1
 EDIFACT status: mandatory Nexteer status: mandatory
 Maximum use: 1 per message Nexteer occurrences: 1 per message
 Function: segment for unique identification of the document name and its number.
 Nexteer interchange: see remarks.

Example: BGM+:::SH+20130711-001+5' Nexteer assigned release number
 A B C

REF	TAG	EDIFACT STANDARD DEFINITION					Nexteer IMPLEMENTATION		
		NAME	ST	FT	SP	ST	FT	REMARKS	
A	C002	DOCUMENT/MESSAGE NAME	C			C		"SH" = Shipment based. See comments.

	4343	RESPONSE TYPE, CODED	C	an..3	'				

COMMENTS

1000 - Document message/name

SH Shipment Based - actual ship date/time is calculated by the Nexteer customer. No calculation is required on the part of the receiver.
 (SH = Indication for "Ship Schedule")

CODE VALUES

1225 - Message function, coded

5	Replace
9	Original

0030**DTM - DATE/TIME/PERIOD**

Segment group:	none	Level:	1
EDIFACT status:	mandatory	Nexteer status:	mandatory
Maximum use:	10 per message at level 1	Nexteer occurrences:	max. 3 per message
Function:	segment specifying the date and, when relevant, the time/period for delivery of that sequence, relating to the whole message. The DTM segment is specified at least once to identify the Delivery Just In Time document date. The date/time/period segment within other segment group(s) is only used whenever the date/time/period requires to be logically related to another specified data item.		
Nexteer interchange:	there may be max. 3 occurrences of DTM in position 0030: to specify the message issue date, one to specify the horizon start date and one to specify the horizon end date.		
Example:	DTM+137:20030325:102'	Document generation date	
	DTM+158:20011221:102'	Horizon start	
	DTM+159:20061231:102'	Horizon end	
	A B C		

REF	TAG	EDIFACT STANDARD DEFINITION			Nexteer IMPLEMENTATION		
		NAME	ST	FT	SP	ST	FT

Document generation date.**Mandatory: always transmitted**

A	C507	DATE/TIME/PERIOD	M			C		
	2005	Date/time/period qualifier	M	an..3	:	M	an..3	"137" = Document message date
B	2380	Date/time/period	C	an..35	:	M	an..35	Actual issue date of the document.
C	2379	Date/time/period format qualifier	C	an..3	:	M	an..3	"102" = CCYYMMDD.

Horizon start date.**Mandatory: always transmitted**

A	C507	DATE/TIME/PERIOD	M			C		
	2005	Date/time/period qualifier	M	an..3	:	M	an..3	"158" = Horizon start date.
B	2380	Date/time/period	C	an..35	:	M	an..35	Start date of planning horizon.
C	2379	Date/time/period format qualifier	C	an..3	:	M	an..3	"102" = CCYYMMDD.

Horizon end date.**Mandatory: always transmitted**

A	C507	DATE/TIME/PERIOD	M			C		
	2005	Date/time/period qualifier	M	an..3	:	M	an..3	"159" = Horizon end date.
B	2380	Date/time/period	C	an..35	:	M	an..35	End date of planning horizon.
C	2379	Date/time/period format qualifier	C	an..3	:	M	an..3	"102" = CCYYMMDD.

Segment group 1: RFF-DTM

Segment group: 1
 EDIFACT status: conditional
 Maximum use: 10 per message at level 1
 Function: group of segments giving references only relevant to the specified party rather than the whole message, e.g. contract number.
 Nexteer interchange: only RFF is transmitted in segment group 1.
 Conditional on use of Ship Direct or Kanban/Shipment based order

0060 RFF - REFERENCE

Segment group: 1 [RFF]
 EDIFACT status: mandatory if segment group 1 is used
 Maximum use: 3 per segment group 1 (max. 10)
 Function: segment for referencing documents to the whole message, e.g. contract, import/export license.
 Nexteer interchange: see remarks.

Example: **RFF+AAN:0550012345'** Nexteer Scheduling agreement (See notes below)

A B

OPTIONAL

REF	TAG	EDIFACT STANDARD DEFINITION					Nexteer IMPLEMENTATION			REMARKS
		NAME	ST	FT	SP	ST	FT			
A	C506	REFERENCE	M			M				For code values see below
	1153	Reference qualifer	M	an..3	:	M	an..3			
B	1154	Reference number	C	an..35	:	C	an..35			"AAN" =
	1156	Line number	C	an..6	:					For regular DELJIT's (non-Kanban and non-SHIP Direct), this contains the Nexteer Scheduling Agreement number.
	4000	Reference version number	C	an..35	:					

1153 – Reference Number

AAN – Delivery Schedule number

Segment group 2: NAD-LOC-FTX-SG3

Segment group: 2
 EDIFACT status: conditional
 Maximum use: 20 per message at level 1
 Function: group of segments identifying names and addresses and their functions relevant for the whole Delivery Just In Time Message.
 Nexteer interchange: segment LOC is not transmitted in segment group 2.

0090 NAD - NAME AND ADDRESS

Segment group: 2 [NAD]
 EDIFACT status: mandatory if segment group 2 is used
 Maximum use: 1 per segment group 2 (max. 20)
 Function: segment identifying names and addresses and their functions relevant for the whole Delivery Just In Time Message. Identification of seller and buyer parties is recommended for the Delivery Just In Time.

Nexteer interchange: the message may contain up to 5 NAD segments as detailed below. Nexteer will always transmit the 'MI', 'SU' and 'ST' and may, if necessary, also send 'OB'.

Example:

A	B	C	D	E	F	G	H			
				NAD+MI+005356878::16'					Material issuer	
				NAD+SU+999123456::16++SUPPLIER NAME'						Supplier
				NAD+ST+005356878::16++NEXTEER AUTOMOTIVE+3900						
				HOLLAND RD+SAGINAW+MI+48601'						Ship To

CODE VALUES

3055 - Code list responsible agency, coded

- 16 DUN & Bradstreet (DUNS)
 92 Assigned by buyer or buyer's agent.

Material Issuer DUNS:

US = 005356878

Mexico

265 = 812392157

266 = 812563302

268 = 812138881

NOTE: The SU value for our Mexico locations, will be the PO/Home Office DUNS only.

Segment group 4: SEQ-DTM-GIR-LOC-SG5-SG7

Segment group: 4
 EDIFACT status: mandatory
 Maximum use: 9999 per message
 Function: group of segments providing details related to the delivery sequence. All other segments in this segment group 4 following the SEQ segment refer to that sequence.
 Nexteer interchange: see segment description.

Level: 1
 Nexteer status: mandatory
 Nexteer occurrences: as required

0160 SEQ - SEQUENCE DETAILS

Segment group: 4 [SEQ]
 EDIFACT status: mandatory when segment group is used
 Maximum use: 1 per segment group 4 (max. 9999)
 Function: segment providing specific details related to the delivery sequence requested by the buyer or recipient of the product.
 Nexteer interchange: SEQ contains a value which has no further meaning for the following segments, it is only used to allow the access to the following segments since SEQ is the trigger segment for the detail section.

Example: **SEQ+6'**
 A

REF	TAG	EDIFACT STANDARD DEFINITION					Nexteer IMPLEMENTATION		
		NAME	ST	FT	SP	ST	FT	REMARKS

	4405	Status, coded	C	an..3	+					

Segment group 5: PAC-SG6

Segment group: 5 [SEQ.SG5] Level: 2
 EDIFACT status: conditional Nexteer status: conditional
 Maximum use: 5 per SEQ in segment group 4 Nexteer occurrences: 1 per preceding SEQ
 Function: group of segments to support KANBAN operation where customers must notify a supplier packaging labels and conditions.
 Nexteer interchange: this segment group is used to transmit supplier packaging labels and conditions when required.

0210 PAC - PACKAGE

Segment group: 5 [SEQ.PAC] Level: 2
 EDIFACT status: mandatory if segment group 5 is used Nexteer status: mandatory
 Maximum use: 1 per segment group 5 (max. 5 per SEQ) Nexteer occurrences: 1 per segment group 5
 Function: segment describing the number and type of packages/physical units.
 Nexteer interchange: see remarks.

Example: **PAC++:67'**
A

REF	TAG	EDIFACT STANDARD DEFINITION				Nexteer IMPLEMENTATION

Segment group 6: PCI-GIN

Segment group: 6 [SEQ.PAC.SG6] Level: 3
 EDIFACT status: conditional Nexteer status: conditional
 Maximum use: 999 per PAC in segment group 5 Nexteer occurrences: max. 8 per PAC.
 Function: group of segments giving packaging identification and good identity number related to the segment PAC.
 Nexteer interchange: only segment PCI is used by Nexteer. Max. 8 occurrences of segment group 6 may occur to provide full labeling instructions.

0230 PCI - PACKAGE IDENTIFICATION

Segment group: 6 [SEQ.PAC.PCI] Level: 3
 EDIFACT status: mandatory if segment group 6 is used Nexteer status: mandatory
 Maximum use: 1 per segment group 6 (max. 999 per PAC) Nexteer occurrences: 1 per segment group 6
 Function: segment specifying markings and labels on individual packages or physical units.
 Nexteer interchange: see remarks.

0460.[LIN.QTY].DTM

Cumulative quantity required since start of inventory year
Cumulative calculation period start date
Cumulative calculation period end date

0440 QTY - QUANTITY

Segment group: 11 [QTY.SCC.DTM.SG12] Level: 3
 EDIFACT status: mandatory when segment group 11 is used Nexteer status: mandatory
 Maximum use: 1 per segment group 11 (max. 100 per LIN) Nexteer occurrences: 1 per segment group 11
 Function: segment to specify pertinent quantities relating to the line item.
 Nexteer interchange: see remarks.

Example: **QTY+79:20800:C62'** Shipment based only
 A B C

EDIFACT STANDARD DEFINITION							Nexteer IMPLEMENTATION			
REF	TAG	NAME	ST	FT	SP	ST	FT	REMARKS		
A	C186 6063	QUANTITY DETAILS Quantity qualifier	M M	an..3	:	M M	an..3	"79" = Actual cumulative quantity required by Nexteer.		
B	6060	Quantity	M	n..15	:	M	n..12	Cumulative quantity required since start of inventory year by this supplier to this plant.		
C	6411	Measure unit qualifier	C	an..3	'	C	an..3	For code value see UN/ECE Recommendation no. 20.		

COMMENTS

6060 – Quantity

Supplier payment made against Nexteer Quantity Received and not Supplier Quantity Shipped.

0560 DTM - DATE/TIME/PERIOD

Description: see quantity information 1.

Example: **DTM+51:20030301:102'** Start date
DTM+52:20030331:102' End date
 A B C

EDIFACT STANDARD DEFINITION							Nexteer IMPLEMENTATION			
REF	TAG	NAME	ST	FT	SP	ST	FT	REMARKS		

Start date

0440 QTY - QUANTITY

Segment group: 11 [QTY.DTM] Level: 3
 EDIFACT status: mandatory when segment group 11 is used Nexteer status: mandatory
 Maximum use: 1 per segment group 11 (max. 100 per LIN) Nexteer occurrences: 1 per segment group 11
 Function: segment to specify pertinent quantities relating to the line item.
 Nexteer interchange: see remarks.

Example: QTY+1:14400:C62'
 A B C

EDIFACT STANDARD DEFINITION						Nexteer IMPLEMENTATION			
REF	TAG	NAME	ST	FT	SP	ST	FT	REMARKS	
A	C186 6063	QUANTITY DETAILS Quantity qualifier	M M	an..3	:	M M	an..3	"1" = Discrete Quantity "3"- Cumulative Shipped quantity (received)	
B	6060	Quantity	M	n..15	:	M	n..12	Actual quantity to be shipped of the product identified in the preceding LIN.	
C	6411	Measure unit qualifier	C	an..3	:	C	an..3	For code value see UN/ECE Recommendation no. 20.	

Note: We will be providing a past due qty where the DTM will be from a previous date. This value is provided by taking the Cum required and subtracting the cum received. We do not take into consideration the In-Transit qty. This value is for your information only and you may calculate your own past due using your total cum and shipment information.
